

MTX Connect Launches NetProtect in Collaboration with Whalebone

Pontpierre, Luxembourg, 13th May, 2025: MTX Connect has partnered with Whalebone to introduce NetProtect, a comprehensive cybersecurity solution for its customers. This collaboration aims to enhance the security of MTX Connect's users by providing seamless protection against various cyber threats

Enhancement of digital safety – seamlessly integrated

NetProtect operates at the network level, safeguarding all connected devices without the need for additional installations. This ensures that users enjoy a secure internet experience across all their devices. The service effectively blocks access to malicious websites, phishing attempts, and other online threats, thereby enhancing the overall digital safety of MTX Connect's clientele. The structured approach with comprehensive support ensures that NetProtect is seamlessly integrated into MTX Connect's existing services, offering users an effortless and secure online experience.

Whalebone, established in 2016 in Brno, Czech Republic, is renowned for its DNS-based security solutions that protect networks and users against malware, ransomware, spyware, and phishing attacks. Their technology filters internet traffic, allowing legitimate content while blocking harmful elements before they reach the end-user.

"Partnering with Whalebone has enabled us to offer our customers an advanced cybersecurity solution that is both effective and easy to use. Their expertise in network-level protection has been instrumental in enhancing the security of our services," said Mike Kornev, CTO at MTX Connect.

The collaboration between MTX Connect and Whalebone encompasses various aspects, including go-to-market strategy, marketing, sales, and seamless technical implementation while generating a new revenue stream for the telco.

About MTX Connect

MTX Connect is a Luxembourg-based mobile network operator and proud GSMA member, delivering global mobile data services via native SIM and eSIM technologies. Founded in 2013, the company serves customers across Europe, North America, Asia, and select countries in Africa and Australasia.

With roaming agreements spanning more than 400 networks in over 160 countries, its business division MTX Connect for Business provides secure, compliant, and fully tailored connectivity solutions to organisations of all sizes – from agile SMEs to large enterprises – and helps them keep their teams securely connected anywhere in the world. MTX Connect is headquartered in Luxembourg with a branch office in Prague, Czech Republic.
